Professional Profile

Full-Stack Junior Developer with hands-on experience building responsive web interfaces using HTML, CSS, JavaScript, and React, combined with a solid foundation in C#, ASP.NET Core, and SQL Server.

Skilled in developing functional front-end components, consuming APIs, and implementing basic back-end logic for real-world projects.

Experience collaborating with stakeholders to translate requirements into usable digital solutions and delivering maintainable code across both client and server environments.

Education

Universidad Autónoma de Centro América (UACA)

- **Systems Engineering** (Graduation: August 2026)

Languages:

- **Spanish:** native
 - **English:** B1
-

Professional Experience

Expertech – Infrastructure Technician:

(1 June 2025 – 23 September 2025)

- Provided IT infrastructure support for corporate clients. Performed preventive and corrective maintenance on servers and networks. Diagnosed and resolved hardware and software issues.

ASCADA - Institutional Website Development:

(2 February 2025 - 28 August 2025)

- Developed and maintained an institutional website using HTML, CSS and JavaScript. Implemented responsive design for desktop and mobile devices. Improved content structure and usability.
-

Projects

- **ASP.NET API:** Built a RESTful API for user management with full CRUD operations using ASP.NET Core and C#. Implemented validation, error handling, JSON serialization, and basic middleware configuration. Documented endpoints using Swagger for easier testing and integration.
- **C# Systems:** Billing & hotel reservation apps with relational DBs.
- **HTML5, CSS, JS:** Responsive product-based sites focused on UI/UX

Certifications

- **Coursera & Microsoft:** *Back-End Development with .NET*
- **Coursera & Microsoft:** *Introduction to Programming with C#*

Basic Skills

- **Front-end:** HTML5, CSS3, JavaScript, React
- **Back-end:** C#, SQL Server, ASP.NET
- **Tools:** Git, GitHub, Visual Studio, VS Code
- **Network:** Basic networking knowledge
- **Infrastructure:** Intune, Active Directory, FortiGate
